Application

Single Run 60 is the most versatile of all slides, with a full 'C' section aluminium track and 4 wheels per hanger, it offers long life, stability and a high capacity of 60kg. Two, quick release plate options allow for either standard straight sliding applications with side feed access or a cavity door application with end feed access. Both offer easy height adjustment with a single spanner (supplied). The Single Run sets are supplied with clip stops or 2 soft close devices. The Cavity Run kits do not include clip stops or soft close.

Kits Available

SR60-20/1 or SR60-S20/1
Track Length: 2000mm,
Single Panel

CR60-20/1
Track Length: 2000mm,
Single Panel
